

**QTIG56-A**

## Functional characteristics

- ▲ Temperature detection tolerance:  $\pm 0.5$  °C (at room temperature)
- ▲ Voltage: 220V ~ 250V
- ▲ Power: 200W
- ▲ Net weight: 50kg
- ▲ Inner frame dimension: 2000mm (H) × 700mm (W) × 500mm (d)
- ▲ Outer frame dimension: 2270mm (H) × 830mm (W) × 500mm (d)
- ▲ Application: Railway station, bus station, subway station, hospital, gymnasium, factory, office building, large-scale events and other public places.

## Product characteristics

- (1) The machine is more accurate to two decimal places (generally other machines only display one decimal place)
- (2) The sensor probe can be adjusted automatically based on height of passing people
- (3) Fast and convenient installation, i.e. ready to use
